

## SMART PORTS 4.0 SUMMIT

Excerpts from an interview with  
**Mira Juola** | *Finance & Port Digitalization*

**PORT  
OULU**

**What was the biggest focus of the company/organisation you represent recently?**

Offering new digital services for port stakeholders; organizations working, visiting, maintaining the port area, and the freight owners.

**What are the most promising solutions for the port industry in the upcoming years?**

Cloud services, various wireless network solutions; private mobile networks and 5G and even 6G.

**What are the signs of the inevitable ports digital revolution? Which major changes can we expect?**

Manual processes and paperwork will be replaced by digital solutions.

**Do you think the sector is ready for the upcoming changes?**

A lot to be done – great possibilities!

**What are the key technologies you would recommend to maintain profitability as well as decarbonisation trends?**

Sharing data will improve the effectiveness, safety & security, and sustainability of port operations.
