

## SMART PORTS 4.0 SUMMIT

Excerpts from an interview with  
**Nineta Polemi** | *Professor and TBA*

**UNIVERSITY  
OF PIRAEUS**

**What was the biggest focus of the company/organisation you represent recently?**

Risk Assessment, human factors in cybersecurity management.

**What are the most promising solutions for the port industry in the upcoming years?**

Security management cloud services, security certified ICT tools and secure navigation ICT systems.

**What would be the key message you would like to share with the industry?**

- Maritime cyber products need to be certified by authorised EU bodies;
- The maritime digital services need to be accompanied with Service Level Agreements where security and privacy issues are addressed; and
- The maritime critical infrastructures (port authorities and ships) need to be compliant with NIS, NIS 2, eIDAS and CybersecurityAct directives.
